Reach for Recovery!

Parkman Recovery Center Addiction Services

Parkman Recovery Center delivers effective, evidence-based addiction services that are individually-tailored to each patient's unique needs.

Our compassionate, highly-qualified clinicians are committed to improving our patients' quality of life. We provide a continuum of care that supports patients throughout the recovery process and promotes the long-term sobriety they deserve.

Parkman Recovery Center strives to make our addiction treatment and supplemental services easily accessible to patients seeking recovery. We accept Medicaid, select private insurance and self-pay. Our safe, comfortable and well-appointed facility is conveniently located off Parkman Road in Trumbull County and only 20 minutes from Mahoning and Portage Counties.

Detox

During this physician-supervised service, the body is cleansed of mood-altering substances. Patients become medically-stable and regain their energy, which enables them to fully engage in treatment with renewed focus and clarity, while also receiving:

- **Access to licensed counselors**
- **Safe and comfortable withdrawal management**
- **An introduction to treatment activities, such as group counseling and 12-step recovery meetings**

Intensive Extended Treatment

Because we understand effective treatment is not "one size fits all," Parkman Recovery Center's evidence-based addiction services are tailored to each patient's specific needs. We deliver an immersive recovery experience—empowering patients with the confidence and tools needed to achieve long-term sobriety—through services such as:

- **Individual counseling to identify behavioral patterns and triggers contributing to addiction**
- **Family counseling to uncover and address the family dynamic as it relates to addiction**
- **Group counseling that provides encouragement, understanding and peer support**
- **Case management for life skills training, assistance with goal setting and linkage with community resources**
- **Psychoeducation for a better understanding of substance use disorders**
- **Relapse prevention to identify and prevent potential high-risk situations**
- **12-step recovery meetings that provide the foundation for a consistent program of action**
- **Crisis intervention, when needed**
