FOR IMMEDIATE RELEASE

### **First Step Recovery acquires Parkman Recovery Center**

**Warren, OH -- (April 13, 2021)** -- First Step Recovery, one of the top drug and alcohol addiction centers in the state, is excited to announce the acquisition of Parkman Recovery Center.

Parkman Recovery Center is one of Ohio's leading drug/alcohol addiction treatment centers. They provide treatment for patients all over Ohio including Akron, Canton, Cleveland, Warren, and Youngstown. Parkman Recovery Center is medically licensed and has a reputation for providing high-quality care in a small intimate setting. Services include inpatient detox, residential and extended care programming, psychoeducation, and holistic life skills. Parkman Recovery Center has been working closely with First Step Recovery from the beginning, and this acquisition is a natural transition for both facilities.

"Although First Step Recovery has always had a close working relationship with Parkman Recovery Center, the acquisition allows us to collaborate more synergistically and gives us the opportunity to expand our programming and create a flexible continuum of care. We will continue to respond to the evolving needs existing within our special field of addiction treatment," says Cindy Woodford, Chief Operating Officer of First Step Recovery and Parkman Recovery.

The overall goal of the acquisition is to be able to serve the needs of Ohio more completely. Parkman Recovery Center will continue to offer the same successful treatment programs, but will now be able to offer more resources to their patients.

"We are so excited to announce that our partnership continues to grow," says Dan Pew, Director of Community Outreach for Parkman Recovery. "The acquisition allows us to work more closely as a team to provide services to our clients."

Together with First Step Recovery and their affiliate, Travco Behavioral Health, Parkman Recovery Center will also offer mental health and outpatient addiction services, including medication-assisted treatment (Suboxone and Vivitrol).
